PROFESSIONAL SUMMARY

Adaptable Software Engineer focused on building resilient, high-throughput microservices and scalable full-stack applications. Proven track record of improving system performance, optimizing API response times, and reducing cloud infrastructure costs without compromising availability. Dedicated to delivering reliable, maintainable codebases, streamlining deployment pipelines, and translating business requirements into seamless client-facing features.

TECHNICAL SKILLS

- **Languages:** Java, Python, JavaScript, TypeScript, C++, SQL, Bash
- **AI/ML:** LLM Inference Pipelines, Model Serving, Prompt Engineering, Computer Vision, MediaPipe, NumPy
- **Backend:** FastAPI, Node.js, Express.js, Spring Boot, REST APIs, Microservices, Event-Driven Architecture, Concurrency
- **Frontend:** React.js, HTML5, CSS3, Responsive Design, Full Stack Development
- **Databases:** PostgreSQL, MySQL, Schema Design, NoSQL, Query Optimization
- **Cloud/DevOps:** AWS (EC2, S3, RDS, Lambda), Docker, Kubernetes, Git, CI/CD, Linux, Agile
- **Testing:** Selenium WebDriver, REST API Testing, Unit and Integration Testing, Debugging, Performance Tuning

PROFESSIONAL EXPERIENCE

AI/ML Engineer Aug. 2025 – Aug. 2026

Quak Travel | Boston, USA

- Integrated AI services with FastAPI, boosting accuracy by 15%, reducing inference latency by 20%, and saving around \$20K/year in cloud costs.
- Engineered and deployed containerized services on AWS using Kubernetes, optimizing scalable backend services to reduce latency by 40% and support 1.5K+ requests/sec.
- Implemented concurrent processing and distributed APIs, cutting inter-service latency by approximately 30% and improving system scalability.
- Improved reliability via logging/monitoring, achieving 99.9%+ uptime and reducing downtime by 25%.

Software Engineer Jan. 2023 – Jun. 2024

Riya Softweb Solutions | India

- Built and maintained CRM and HRMS platforms with Node.js/Express backends, shipping features end to end and resolving 50+ issues monthly; cut resolution time 25–30% and improved user satisfaction 15–20%.
- Implemented role-based access control and database update logic across the stack, improving data integrity 20% while keeping live systems running through releases.
- Migrated monolithic backend APIs into decoupled microservices, improving API response times by ~20% and boosting system maintainability.
- Documented service workflows, REST API contracts, reducing recurring issues ~22% and improving team efficiency.
- Performed functional and REST API testing to validate end-to-end workflows and catch defects, collaborating with developers to improve system reliability.

Full Stack Developer Jan. 2022 – Jan. 2023

Ingenious Infotech | India

- Developed and maintained 10+ client-facing web applications end to end, building responsive frontend interfaces with JavaScript, HTML, and CSS alongside Node.js and Express.js backends.
- Designed and integrated REST APIs connecting frontend components to backend services and relational databases.
- Worked directly with clients to gather requirements and translate them into working features, delivered on schedule across concurrent engagements.
- Optimized existing codebases by debugging, frontend tuning, & query improvements, cutting page load times by 30%.

PROJECTS

PrismEDU - Full-Stack Learning Management System | [Github](#) Jul. 2025

- Developed React frontend and Node.js/Spring Boot APIs with role-based access and scalable architecture.
- Optimized backend and database queries, reducing API response time by ~25%.
- Tech Stack: React, Node.js, Express, PostgreSQL/MySQL, Python (Flask/FastAPI), AWS, GitHub.
- Performed UI automation using Selenium and REST API testing to validate functionality and integrations.

EDUCATION

University of Texas at Arlington | M.S. in Computer and Information Sciences | 3.90/4 Aug. 2024 – May. 2026

Gujarat Technological University | B.E. in Information Technology | 9.17/10 Jul. 2020 – Jul. 2024
